

Information about Norman Rogers

Education: BA Physics University of California, Berkeley, MS Physics, University of Hawaii

Business Career: Worked variously for IBM, Hewlett Packard, GenRad, and as an independent consultant. Founded Rabbit Semiconductor, a manufacturer of embedded computer hardware and software. The company was purchased by Digi International. I retired in 2006.

Organizational affiliates- Board Member: CO2 Coalition. Former board member: National Association of Scholars. Policy Advisor: Heartland Institute. Member: American Geophysical Union, American Meteorological Society. Recognized by: DeSmog Blog.

Since I retired, I have written approximately 60 articles, mostly related to climate change or alternative energy. I am critical of sketchy science, especially in the climate area. I am a resident of Las Vegas, Nevada.
